RESEARCH INTERESTS

Ultrafast 3D Ultrasound Imaging, Deep Learning in Ultrasound, Signal & Image Processing

EDUCATION

University of Illinois Urbana-Champaign, Urbana, IL Expected June 2023
Ph.D. candidate in Electrical and Computer Engineering
Advisor: Prof. Pengfei Song
"Innovations in Three-dimensional Ultrafast Ultrasound Imaging"
Sub Field: Biomedical Imaging & Signal Processing
GPA: 4.0/4.0

University of Michigan, Ann Arbor, MI Aug 2017 - Dec 2018
M.S. in Electrical and Computer Engineering
Sub Field: Signal & Image Processing and Machine Learning
GPA: 4.0/4.0

Southeast University, Nanjing, China Aug 2013 - June 2017
B.Eng. in Information Engineering
Honor Student in Chien-Shiung Wu College
GPA: 3.7/4.0

RESEARCH & PROJECTS

Ultrafast 3D Ultrasound Imaging Using Fast-tilting and Redirecting Reflectors May 2019 - Present
Advisor: Prof. Pengfei Song, University of Illinois Urbana-Champaign
Collaborations with Texas A&M University

- Proposed a new 3D ultrasound imaging technique: Fast Acoustic Steering via Tilting Electromechanical Reflectors (FASTER). The FASTER 3D imaging achieved high volume rates with conventional 1D array transducers, which could make 3D ultrasound imaging to be a possibility wherever 2D ultrasound imaging is used [Press Coverage] ;
- Apply FASTER 3D imaging in different imaging modalities such as shear wave imaging and ultrasound microvessel imaging.

Ultrafast 3D Ultrasound Imaging Using 2D Row-Column Addressing (RCA) Arrays Dec 2019 - Present
Advisor: Prof. Pengfei Song, University of Illinois Urbana-Champaign
Collaborations with Mayo Clinic

- Achieved high volume-rate 3D imaging with comparable imaging quality using RCA arrays;
- Proposed multiple advanced 3-D ultrasound modes with RCA arrays including 3-D shear wave elastography and 3-D super-resolution ultrasound localization microscopy;
- Developed a deep learning-based 3D adaptive beamforming method to improve spatial resolution and image contrast.

Deep Learning-based Phase Aberration Correction Jan 2022 - Present
Advisor: Prof. Pengfei Song, University of Illinois Urbana-Champaign
Collaborations with Prof. Mark Anastasio

- Proposed a deep learning-based phase aberration correction algorithm that directly operates on the pre-beamformed, raw channel data;
- Achieved beamformed image correction with improved beam width as well as localization error for super-resolution ultrasound localization microscopy application.
